Pseudocode for Code 2: PermMissingElem

```
FUNCTION solution (A)
    N ← length of A
    expected_total ← 0  # starts running total
    FOR i FROM 1 TO N+1  # Counting loop, starts at 1 until and including N+1
        expected_total ← expected_total + i  # adds the current count to total
    END FOR
    actual_total ← 0  # running total
    FOR EACH number IN A  # goes through the list one at a time
        actual_total ← actual_total + number  # adds to the running total
    END FOR
    RETURN expected_total - actual_total  # gives back the missing element
END FUNCTION
```
